Terminal Disclaimer

An attorney or agent, not of record, is not authorized to sign a terminal disclaimer in the capacity as an attorney or agent acting in a representative capacity as provided by 37 CFR 1.34 (a). See 37 CFR 1.321(b) and/or (c).

Obviousness-type Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Omum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 34 - 40 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims of copending **Application No. 12/243346**; or **Application No. 11/498336**;. Although the conflicting claims are not identical, they are not patentably distinct from each other because each of the claims of either application contains

Art Unit: 1796

dependent claims which, when read as a whole, contain the same subject as presently claimed and thus would have been obvious over the claimed invention.

Note that copending application 12/243346 claims a method for controlling the injection of catalyst slurry to a polymerization reactor which appears to require the same recovery steps as that of the claimed invention although stated differently. Likewise, in copending application 11/498336, the directing of the polymer slurry in the first reactor into a settling leg...and the transferring of the polymer slurry through a transfer system appear to encompass the same method as currently claimed. Thus, when interpreting the claimed language of the present application in light of the specification, particularly with regard to the drawings or figures, it is not clear whether the recovery of the slurry from the polymerization reactor and the steps accompanying such of the presently claimed invention would not encompass the withdrawing of the slurry in copending application 12/243,346 or the directing of the polymer slurry into a settling leg and consequently transferring from the settling leg in steps c and d of copending application 11/498,336. It is also noted that each of the copending applications require that a horizontal level be maintained may be interpreted by the Examiner are the same as the claimed language of the present invention, i.e. adapted to maintain the level of polymer be maintained at a predetermined level".

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

Art Unit: 1796

the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
